DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 25-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Suskind et al., US Patent No. 4,929,498.

Suskind et al. teaches a wet wiper in which an antimicrobial solution is added to the pulp/fibers and the agent becomes substantive to the fibers, see abstract. The fibers in combination with non-treated fibers are formed into a treated paper. The web is formed using wet laid techniques and the fibers retain the antimicrobial agent, since they becomes substantive to the fibers, see column 3, lines 6-47 and example 1. Suskind et al. also teach the use of organosilicone quaternary ammonium compound such as the ones claimed, see column 3, line 49 through column 4, line 53. The amount of antimicrobial agent in the product is within the claimed range, see column 5, lines 40-58 and Suskind et al. teach also the hydroentangling of the cellulosic fibers with synthetic fibers, spunbond, see column 2, lines 10-46.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the Art of "Antimicrobial Fabrics."
